CAMELLIA JAPONICA

FIELD GROWN

These Camellias have been grown, since liners, in full sun under irrigation. In most grades, especially 12 to 18 inch and up, they are much heavier and much more compact than similar grades grown in slat houses. Full sun tends to make Camellias branch early, and grow bushy. They are not to be compared with slat house plants.

*Figures after variety denote the size or sizes available in that particular variety.
